

**STAFF REPORT TO THE PLANNING AND ZONING COMMISSION
DEPARTMENT OF PLANNING AND NEIGHBORHOOD SERVICES
COMMUNITY PLANNING DIVISION
CASE TYPE – PRELIMINARY SUBDIVISION
CASE PLANNER: BOB BLEVINS**

Hearing Date: February 27, 2023 **Case Number:** SUBD-40583-2022

Project Description/Location: This is a request by Core Engineering Group, PLLC, on behalf of Butler Estates, LLC, for approval of the preliminary plat for the Butler Estates Subdivision. This subdivision contains approximately 12.59 acres and is proposed to be divided into 52 residential lots, ranging in size from approximately 5,326 sq. ft. to 10,952 sq. ft., for the property located at the northwest corner of E. 37th Street and S. Avenue 10E, Yuma, AZ.

	Existing Zoning	Existing Land Use	Designated Land Use
Site	Conditional Medium Density Residential (R-2-5)	Vacant	Medium Density Residential
North	Recreational Vehicle Subdivision (RVS)	Vacant	Medium Density Residential
South	Recreational Vehicle Subdivision (RVS) / Low Density Residential (R-1-40)	Vacant / Single Family Residence	Medium Density Residential
East	Recreational Vehicle Subdivision (RVS) / County Recreational Vehicle Subdivision (RVS)	Vacant / Via Chaparral Subdivision Residences	Medium Density Residential
West	Recreational Vehicle Subdivision (RVS)	Vista Del Sol Subdivision Residences	Medium Density Residential

Location Map

Prior site actions: Annexation: ANEX-7505-2014 (03/18/2015); Rezone: ZONE-39444-2022 (R-1-40 to R-2-5).

Staff Recommendation: Staff recommends **APPROVAL** of the preliminary plat for the Butler Estates Subdivision, subject to the conditions outlined in Attachment A.

Suggested Motion: Move to **APPROVE** Preliminary Plat SUBD-40583-2022 as presented, subject to the staff report, information provided during this hearing, and the conditions in Attachment A.

Effect of the Approval: By approving the preliminary plat, the Planning and Zoning Commission is acknowledging the street and lot layout of Butler Estates Subdivision which includes 52 lots ranging in size from 5,326 square feet to 10,952 square feet for the property located at the northwest corner of E. 37th Street and S. Avenue 10E, Yuma, AZ , subject to the conditions of the rezoning and the conditions outlined in Attachment A, and affirmatively finds that the request is in conformance with the City of Yuma Subdivision Code and General Plan and is compatible with surrounding land uses.

Staff Analysis: The applicant states:

“The owner is proposing to develop lots 16, 18, and 20 of Ranchos El Toreo Subdivision into R-2-5 Medium Density Single Family residential subdivision. This request represents the 12.596 acres of the lots. The Preliminary Plat proposes the subdivision of the four existing parcels into 52 new parcels conforming with the City of Yuma Zoning Ordinance for an R-2-5 subdivision and all applicable City of Yuma and Yuma County Codes.

“Per the Conditions of Approval for Rezoning Case 02022-032 Avenue 10 E is proposed to be constructed in accordance with Yuma County Standard 2-020 with a 5-foot sidewalk where the properties have frontage along Avenue 10 E.

“Based on the preliminary development meeting, 37th Street and 37th Place are designed as local 2-lane streets, and 38th Street is developed as a hybrid half-width road which will accommodate 2-way traffic and a 4-foot sidewalk is provided within the constraints of the standard 29' half-width right-of-way for a local 2-lane street. Butler Avenue is designed as a 30' wide fire department access road.

“Far West Water and Sewer will provide sewer service and the City of Yuma will provide water service to the lots from connection points near the intersection of Butler Avenue and 36th Street alignment to the North.”

The applicant is proposing a subdivision with most lots typically between 6,949 to 7,150 sq. ft. in size. The R-2-5 Zoning District allows for site-built homes; with no manufactured homes or recreational vehicles as dwellings permitted. R-2-5 zoning allows lots of 5,000 sq. ft. minimum; therefore this preliminary plat supersedes the densities in the Medium Density Land Use Designation in the General Plan.

To the east is Villa Chaparral Subdivision, zoned RVS in the County, which has site-built homes on lots typically of 6,500 square feet. To the north is an RV resort zoned Manufactured Home Park (MHP) in the City. To the west is Vista del Sol Subdivision, zoned RVS in the City with a mixture of dwelling types. To the south of 40th Street is vacant desert in the City zoned Agriculture (AG).

City Engineering has the following comment:

A payback agreement can be obtained for the portions of the water line being extended outside of the subdivision areas. This payback needs to be requested prior to the start of construction in written format with an accurate construction estimate, followed by certified water line construction costs afterward.

1. Does the subdivision comply with the zoning code and the zoning district development standards?

Yes.

2. Does the subdivision comply with the subdivision code requirements?

Yes.

<u>Standard</u>	<u>Subdivision</u>						<u>Conforms</u>				
Lot Size	Minimum:	5,326.56 S.F.		Maximum:	10,952.89 S.F.		Yes	X	No

**ATTACHMENT A
PRELIMINARY PLAT
CONDITIONS OF APPROVAL**

The following conditions of approval have been determined to have a reasonable nexus to the requested subdivision application and are roughly proportionate to the impacts associated with the subdivision and expected development on the property.

Department of Planning and Neighborhood Services Comments: Alyssa Linville, Director of Planning and Neighborhood Services (928) 373-5000, x 3037:

1. The conditions are in addition to City codes, rules, fees and regulations that are applicable to this action.
2. The Owner's signature on the application for this land use action shall constitute a waiver of any claims for diminution in value pursuant to A.R.S. § 12-1134.

City Attorney Comments: (928) 373-5058:

3. The rights-of-way must be dedicated free and clear to the City, and all easements in the right-of-way must be vacated unless the easement is specifically presented to the City, and the City specifically approves its acceptance. Approval of the plat is not approval of an easement in the right-of-way.
4. Any easements on other property in the subdivision must be vacated to the extent that they would require a utility, licensed cable operator, or other licensed or franchised communications system (collectively, the "utilities") to:
 - a. pay to cross the easement to reach any structure on the lot;
 - b. prevent the utilities from providing service to any structure on a lot; or
 - c. effectively prevent any entity authorized to place facilities in a utility easement from using the easements or accessing potential customers passed by the easement.
5. Approval of the plat does not authorize the maintenance or installation of any facility in the rights of way, whether or not contemplated by the plat, without a license, franchise, or similar authorization issued by the City.

Engineering Comments: Andrew McGarvie, Engineering Manager (928)373-5000, x 3044:

6. ~~The Developer/Owner shall design and construct Butler Ave as a full width alternative collector street per City of Yuma construction standard 2-025 including street lights from the northern edge of the subdivision to the southern edge of the subdivision, with all utilities stubbed out under the roadway pavement. The~~ **Developer/Owner shall design and construct Butler Ave as a full width local street per City of Yuma construction standard 2-030, with the sidewalk being set 3 feet behind the curb, and to include street lights from the northern edge of the subdivision to the southern edge of the subdivision, with all utilities stubbed out under the roadway pavement. The design and construction shall include curb, gutter and sidewalk on the east side of roadway which shall be continuous from the northern project limits to the southern project limits. Along the west side of Butler Ave, the sidewalk, curb and gutter may be placed solely along the west side Butler Ave frontage. Developer/owner shall include "No Parking" signs along the east and west side of Butler Avenue in the design and construction.**
7. ~~The Developer/Owner shall enter into a development agreement with the City of Yuma prior to the final plat recordation, for the opportunity to recover fair share Butler Avenue construction costs from the adjoining property owners, in a payback agreement modeled on the sewer payback agreements found in Article II Sewer Regulations, section 2.5 Reimbursement Agreements, that will be in effect for a period~~

~~of 15 years.~~ **The Developer/Owner shall enter into a development agreement with the City of Yuma prior to the final plat recordation, for the opportunity to recover fair share Butler Avenue construction costs from the adjoining property owners, in a payback agreement modeled on the sewer payback agreements found in Article II Sewer Regulations, section 2.5 Reimbursement Agreements, that will be in effect for a period of 20 years.**

8. The Developer/Owner shall ensure that all streets entering Avenue 10E meets the City of Yuma Standard 3-170 "Angle of Intersections".
9. The Owner shall record a raised median covenant along Ave 10E frontages.
10. The Owner shall record a 1' non-access easement along Ave 10E frontages on the Final plat, excluding the public streets, similar to that shown in City of Yuma construction standard 3-005.
11. The Developer/Owner shall extend, design and construct a minimum 8" waterline from the existing 10" water line on 36th Street, along Butler Avenue to the south edge of the proposed subdivision.
12. The Developer/Owner shall construct sewer as required by the service provider (Foothills Utilities, AKA Far West Water & Sewer).
13. ~~Confirmation and written documentation from the owner of APN: 699-56-017, that the proposed 38th Street design and layout will work for their future development will be provided by the Developer/Owner prior to Final Plat approval.~~ **Should the Final Plat layout of 38th Street require the access and/or right-of-way from the property owner of APN 699-56-017, then written documentation confirming acceptance of the layout from the property owner will be required of APN: 699-56-017, and will be provided by the Developer/Owner prior to Final Plat approval.**
14. Payment in lieu of construction may be accepted by the City of Yuma for the Avenue 10E frontage improvements required by the rezone condition # 5, if the Developer/Owner makes the request in writing to the City Engineer.

Community Planning, Robert M. Blevins, Principal Planner (928) 373-5189:

15. The Owner shall submit a final plat within three (3) year of Preliminary Plat approval. Should a Final Plat not be submitted within three (3) year of the effective date of approval of the Preliminary Plat, the approval of this Preliminary Plat shall be null and void, unless the conditions are contained in an executed Pre-development Agreement

Any questions or comments regarding the Conditions of Approval as stated above should be directed to the staff member who provided the comment. Name and phone numbers are provided.

ATTACHMENT C
REZONE CONDITIONS

1. The conditions listed below are in addition to City codes, rules, fees and regulations that are applicable to this action.
2. The Owner's signature on the application for this land use action shall constitute a waiver of any claims for diminution in value pursuant to A.R.S. § 12-1134.
3. The Owner shall submit to the City of Yuma, for recordation, a signed and notarized Avigation Easement and Range Disclosure on the property acknowledging potential noise and overflight of aircraft from both daily and special operations of the Marine Corps Air Station and the Yuma International Airport.
4. The Owner/Developer shall dedicate right-of-way for a total of 50 feet half-width on Avenue 10E.
5. The Owner/Developer shall construct the half-width of Avenue 10E per Yuma County Standard 2-220 with a five foot sidewalk.
6. Each of the conditions listed above shall be completed within two (2) years of the effective date of the rezoning ordinance or prior to the issuance of a Building Permit, Certificate of Occupancy or City of Yuma Business License for this site, whichever occurs first. If the conditions of approval are not completed within the above timeframe then the rezone shall be subject to ARS § 9-462.01.

Arizona Environmental Online Review Tool Report

*Arizona Game and Fish Department Mission
To conserve Arizona's diverse wildlife resources and manage for safe, compatible outdoor recreation opportunities for current and future generations.*

Project Name:

Preliminary Plat Butler Estates Subdivision

User Project Number:

SUBD-40583-2022

Project Description:

12.59 acres and is proposed to be divided into 52 residential lots, ranging in size from approximately 5,326 sq. ft. to 10,952 sq. ft., for the property located at the northwest corner of E. 37th Street and S. Avenue 10E, Yuma, AZ.

Project Type:

Development Within Municipalities (Urban Growth), Residential subdivision and associated infrastructure, New construction

Contact Person:

Teigan Williams

Organization:

Arizona Game and Fish Department

On Behalf Of:

YUMA

Project ID:

HGIS-17613

Disclaimer:

1. This Environmental Review is based on the project study area that was entered. The report must be updated if the project study area, location, or the type of project changes.
2. This is a preliminary environmental screening tool. It is not a substitute for the potential knowledge gained by having a biologist conduct a field survey of the project area. This review is also not intended to replace environmental consultation (including federal consultation under the Endangered Species Act), land use permitting, or the Departments review of site-specific projects.
3. The Departments Heritage Data Management System (HDMS) data is not intended to include potential distribution of special status species. Arizona is large and diverse with plants, animals, and environmental conditions that are ever changing. Consequently, many areas may contain species that biologists do not know about or species previously noted in a particular area may no longer occur there. HDMS data contains information about species occurrences that have actually been reported to the Department. Not all of Arizona has been surveyed for special status species, and surveys that have been conducted have varied greatly in scope and intensity. Such surveys may reveal previously undocumented population of species of special concern.
4. HabiMap Arizona data, specifically Species of Greatest Conservation Need (SGCN) under our State Wildlife Action Plan (SWAP) and Species of Economic and Recreational Importance (SERI), represent potential species distribution models for the State of Arizona which are subject to ongoing change, modification and refinement. The status of a wildlife resource can change quickly, and the availability of new data will necessitate a refined assessment.

Locations Accuracy Disclaimer:

Project locations are assumed to be both precise and accurate for the purposes of environmental review. The creator/owner of the Project Review Report is solely responsible for the project location and thus the correctness of the Project Review Report content.

Recommendations Disclaimer:

1. The Department is interested in the conservation of all fish and wildlife resources, including those species listed in this report and those that may have not been documented within the project vicinity as well as other game and nongame wildlife.
2. Recommendations have been made by the Department, under authority of Arizona Revised Statutes Title 5 (Amusements and Sports), 17 (Game and Fish), and 28 (Transportation).
3. Potential impacts to fish and wildlife resources may be minimized or avoided by the recommendations generated from information submitted for your proposed project. These recommendations are preliminary in scope, designed to provide early considerations on all species of wildlife.
4. Making this information directly available does not substitute for the Department's review of project proposals, and should not decrease our opportunity to review and evaluate additional project information and/or new project proposals.
5. Further coordination with the Department requires the submittal of this Environmental Review Report with a cover letter and project plans or documentation that includes project narrative, acreage to be impacted, how construction or project activity(s) are to be accomplished, and project locality information (including site map). Once AGFD had received the information, please allow 30 days for completion of project reviews. Send requests to:
Project Evaluation Program, Habitat Branch
Arizona Game and Fish Department
5000 West Carefree Highway
Phoenix, Arizona 85086-5000
Phone Number: (623) 236-7600
Fax Number: (623) 236-7366
Or
PEP@azgfd.gov
6. Coordination may also be necessary under the National Environmental Policy Act (NEPA) and/or Endangered Species Act (ESA). Site specific recommendations may be proposed during further NEPA/ESA analysis or through coordination with affected agencies

Zenaida asiatica	White-winged Dove					
Zenaida macroura	Mourning Dove					

Project Type: Development Within Municipalities (Urban Growth), Residential subdivision and associated infrastructure, New construction

Project Type Recommendations:

Fence recommendations will be dependent upon the goals of the fence project and the wildlife species expected to be impacted by the project. General guidelines for ensuring wildlife-friendly fences include: barbless wire on the top and bottom with the maximum fence height 42", minimum height for bottom 16". Modifications to this design may be considered for fencing anticipated to be routinely encountered by elk, bighorn sheep or pronghorn (e.g., Pronghorn fencing would require 18" minimum height on the bottom). Please refer to the Department's Fencing Guidelines located on Wildlife Friendly Guidelines page, which is part of the Wildlife Planning button at <https://www.azgfd.com/wildlife/planning/wildlifeguidelines/>.

During the planning stages of your project, please consider the local or regional needs of wildlife in regards to movement, connectivity, and access to habitat needs. Loss of this permeability prevents wildlife from accessing resources, finding mates, reduces gene flow, prevents wildlife from re-colonizing areas where local extirpations may have occurred, and ultimately prevents wildlife from contributing to ecosystem functions, such as pollination, seed dispersal, control of prey numbers, and resistance to invasive species. In many cases, streams and washes provide natural movement corridors for wildlife and should be maintained in their natural state. Uplands also support a large diversity of species, and should be contained within important wildlife movement corridors. In addition, maintaining biodiversity and ecosystem functions can be facilitated through improving designs of structures, fences, roadways, and culverts to promote passage for a variety of wildlife. Guidelines for many of these can be found at: <https://www.azgfd.com/wildlife/planning/wildlifeguidelines/>.

Consider impacts of outdoor lighting on wildlife and develop measures or alternatives that can be taken to increase human safety while minimizing potential impacts to wildlife. Conduct wildlife surveys to determine species within project area, and evaluate proposed activities based on species biology and natural history to determine if artificial lighting may disrupt behavior patterns or habitat use. Use only the minimum amount of light needed for safety. Narrow spectrum bulbs should be used as often as possible to lower the range of species affected by lighting. All lighting should be shielded, canted, or cut to ensure that light reaches only areas needing illumination.

Minimize the potential introduction or spread of exotic invasive species, including aquatic and terrestrial plants, animals, insects and pathogens. Precautions should be taken to wash and/or decontaminate all equipment utilized in the project activities before entering and leaving the site. See the Arizona Department of Agriculture website for a list of prohibited and restricted noxious weeds at <https://www.invasivespeciesinfo.gov/unitedstates/az.shtml> and the Arizona Native Plant Society <https://aznps.com/invas> for recommendations on how to control. To view a list of documented invasive species or to report invasive species in or near your project area visit iMapInvasives - a national cloud-based application for tracking and managing invasive species at <https://imap.natureserve.org/imap/services/page/map.html>.

- To build a list: zoom to your area of interest, use the identify/measure tool to draw a polygon around your area of interest, and select "See What's Here" for a list of reported species. To export the list, you must have an account and be logged in. You can then use the export tool to draw a boundary and export the records in a csv file.

The construction or maintenance of water developments should include: incorporation of aspects of the natural environment and the visual resources, maintaining the water for a variety of species, water surface area (e.g., bats require a greater area due to in-flight drinking), accessibility, year-round availability, minimizing potential for water quality problems, frequency of flushing, shading of natural features, regular clean-up of debris, escape ramps, minimizing obstacles, and minimizing accumulation of silt and mud.

Minimization and mitigation of impacts to wildlife and fish species due to changes in water quality, quantity, chemistry, temperature, and alteration to flow regimes (timing, magnitude, duration, and frequency of floods) should be evaluated. Minimize impacts to springs, in-stream flow, and consider irrigation improvements to decrease water use. If dredging is a project component, consider timing of the project in order to minimize impacts to spawning fish and other aquatic species (include spawning seasons), and to reduce spread of exotic invasive species. We recommend early direct coordination with Project Evaluation Program for projects that could impact water resources, wetlands, streams, springs, and/or riparian habitats.

The Department recommends that wildlife surveys are conducted to determine if noise-sensitive species occur within the project area. Avoidance or minimization measures could include conducting project activities outside of breeding seasons.

Based on the project type entered, coordination with State Historic Preservation Office may be required (<https://azstateparks.com/>).

Trenches should be covered or back-filled as soon as possible. Incorporate escape ramps in ditches or fencing along the perimeter to deter small mammals and herpetofauna (snakes, lizards, tortoise) from entering ditches.

Communities can actively support the sustainability and mobility of wildlife by incorporating wildlife planning into their regional/comprehensive plans, their regional transportation plans, and their open space/conservation land system programs. An effective approach to wildlife planning begins with the identification of the wildlife resources in need of protection, an assessment of important habitat blocks and connective corridors, and the incorporation of these critical wildlife components into the community plans and programs. Community planners should identify open spaces and habitat blocks that can be maintained in their area, and the necessary connections between those blocks to be preserved or protected. Community planners should also work with State and local transportation planning entities, and planners from other communities, to foster coordination and cooperation in developing compatible development plans to ensure wildlife habitat connectivity. The Department's guidelines for incorporating wildlife considerations into community planning and developments can be found on the Wildlife Friendly Guidelines portion of the Wildlife Planning page at <https://www.azgfd.com/wildlife/planning/wildlifeguidelines/>.

Design culverts to minimize impacts to channel geometry, or design channel geometry (low flow, overbank, floodplains) and substrates to carry expected discharge using local drainages of appropriate size as templates. Reduce/minimize barriers to allow movement of amphibians or fish (e.g., eliminate falls). Also for terrestrial wildlife, washes and stream corridors often provide important corridors for movement. Overall culvert width, height, and length should be optimized for movement of the greatest number and diversity of species expected to utilize the passage. Culvert designs should consider moisture, light, and noise, while providing clear views at both ends to maximize utilization. For many species, fencing is an important design feature that can be utilized with culverts to funnel wildlife into these areas and minimize the potential for roadway collisions. Guidelines for culvert designs to facilitate wildlife passage can be found on the home page of this application at <https://www.azgfd.com/wildlife/planning/wildlifeguidelines/>.

Based on the project type entered, coordination with Arizona Department of Environmental Quality may be required (<http://www.azdeq.gov/>).

Based on the project type entered, coordination with Arizona Department of Water Resources may be required (<https://new.azwater.gov/>).

Based on the project type entered, coordination with U.S. Army Corps of Engineers may be required (<http://www.usace.army.mil/>)

Based on the project type entered, coordination with County Flood Control district(s) may be required.

Development plans should provide for open natural space for wildlife movement, while also minimizing the potential for wildlife-human interactions through design features. Please contact Project Evaluation Program for more information on living with urban wildlife at PEP@azgfd.gov or at <https://www.azgfd.com/wildlife/planning/wildlifeguidelines/> and <https://www.azgfd.com/Wildlife/LivingWith>.

Vegetation restoration projects (including treatments of invasive or exotic species) should have a completed site-evaluation plan (identifying environmental conditions necessary to re-establish native vegetation), a revegetation plan (species, density, method of establishment), a short and long-term monitoring plan, including adaptive management guidelines to address needs for replacement vegetation.

The Department requests further coordination to provide project/species specific recommendations. please contact Project Evaluation Program directly at PEP@azgfd.gov.

Project Location and/or Species Recommendations:

HDMS records indicate that one or more native plants listed on the **Arizona Native Plant Law and Antiquities Act** have been documented within the vicinity of your project area. Please contact:

Arizona Department of Agriculture
1688 W Adams St.
Phoenix, AZ 85007
Phone: 602.542.4373

<https://agriculture.az.gov/sites/default/files/Native%20Plant%20Rules%20-%20AZ%20Dept%20of%20Ag.pdf> starts on page 44

HDMS records indicate that one or more **Listed, Proposed, or Candidate** species or **Critical Habitat** (Designated or Proposed) have been documented in the vicinity of your project. The Endangered Species Act (ESA) gives the US Fish and Wildlife Service (USFWS) regulatory authority over all federally listed species. Please contact USFWS Ecological Services Offices at <https://www.fws.gov/office/arizona-ecological-services> or:

NEIGHBOR POSTCARD MAILING**

This is a request by Core Engineering Group, PLLC, on behalf of Butler Estates, LLC, for approval of the preliminary plat for the Butler Estates Subdivision. This subdivision contains approximately 12.59 acres and is proposed to be divided into 52 residential lots, ranging in size from approximately 5,326 sq. ft. to 10,952 sq. ft., for the property located at the northwest corner of E. 37th Street and S. Avenue 10E, Yuma, AZ.

**MEETING DATE,
TIME & LOCATION
FOR CASE #
SUBD-40583-2022**

PUBLIC HEARING
02/27/23 @ 4:30pm
City Hall Council Chambers
One City Plaza, Yuma, AZ

Because you are a neighbor within 300' of the northwest corner of E. 37th Street and S. Avenue 10E , Yuma, AZ you are invited to attend the public hearing to voice your comments. If you have questions or wish to submit written comments, please contact Robert Blevins by phone at (928) 373-5189 or by email at Robert.Blevins@YumaAz.gov
