Re: Appeal from Approval of Conditional Use Permit 43322-2024 for Tanimura & Antle Company Housing Apartment Complex

I am writing on behalf of Tanimura & Antle in further support of its application for the above-referenced project (the "Project"), in response to the appeal filed by Mr. Gregory O'Neal, dated January 3, 2025. We request this letter to be made part of the administrative record in these proceedings and distributed at or prior to the City Council hearing on Mr. O'Neal's appeal scheduled for February 5, 2025.

**A. The Project Serves To Replace Current Dispersed and Inadequate Housing.**

The 12 apartment building Project is located less than a mile from Tanimura & Antle's human resources office and employee bus parking on E. Braden Blvd. Currently, Tanimura & Antle houses 876 H2A agricultural employees across five (5) disparate locations throughout Yuma. Two of the apartment complexes, located at 1020 W. 11<sup>th</sup> Street and 1153 W. 20<sup>th</sup> Street, housing 290 employees, have been owned and operated by Tanimura & Antle since 2008. In recent years, Tanimura & Antle has had to lease three motels to accommodate an additional 586 employees. These converted motels do not offer the same amenities or meet the housing standards of the Project. The Project location is ideal to aggregate company housing close to company transportation and human resource services. Most importantly, all of Tanimura & Antle's employees deserve the same quality housing and amenities that will be provided by the Project.

There are 42 Company permitted housing complexes located throughout the City of Yuma with 5,522 occupants. See the attached map with Company housing complexes noted by yellow pins, and the table of 2024 Company Housing Occupancy provided by the City of Yuma. Of note is the latest 20 apartment building housing development located at 764 S. 21<sup>st</sup> Ave. That development is situated in a residential neighborhood directly across the street from an RV/Mobile Home Park. There is no evidence in the record to support Mr. O'Neal's premise that Company housing is incompatible with other types of housing.

**B. The Project Is Consistent With Current Zoning And The City of Yuma 2022 General Plan.**

The Project is a New Construction Company Housing Complex (Large) as set forth in Yuma City Code Section 154-15.19(C). It is appropriately situated in a Light Industrial Zoning District with a Conditional Use Permit. The traffic that will be generated by the Project is consistent with other Light Industrial permitted uses, including the adjacent Fed Ex facility.

Proud to be an Employee Owned Family Farm

Mr. O'Neal asserts that the construction of the Project will depreciate the value of his property at the Cactus Tree RV Park. However, the Cactus Tree RV Park is located on a parcel that is zoned as Agriculture District with a General Plan designation of Industrial. In no way does the Project further diminish the value of the Cactus Tree RV Park's nonconforming use with its current zoning designation or General Plan designation.

Mr. O'Neal further suggests that Tanimura & Antle locate the Project to the parcel it owns directly east of the Project site. However, that parcel, contiguous to Tanimura & Antle facilities and operations, is zoned Heavy Industrial, and Tanimura & Antle is reserving that parcel for future development.

**C. The Project Attenuates Noise and Lighting in Compliance With Yuma City Codes**

As noted in the Project description, the perimeter of the Project will be fenced. Exterior lighting, consistent with the Yuma City Code, will be shielded downward to ensure adequate lighting for safety and security while minimizing lighting spillover to the neighboring residents.

The Project is designed to appropriately attenuate noise. The buildings are 60 feet or more from the Cactus Tree RV Park property line. Landscaping will also act as a buffer, and interior noise levels will be lessened by Building Code acoustical requirements. The highest maximum instantaneous noise levels generated by Project construction could typically range from about 90 to 95 dBA Lmax at a distance of 50 feet from the noise source. Tanimura & Antle will manage the construction to comply with Yuma Noise Control Ordinance Chapter 133. Since the Project will be owned and operated by Tanimura & Antle with an on-site manager, the Project will likewise be managed to ensure compliance with Yuma Noise Control Ordinance Chapter 133.

In conclusion, the Planning Commission's approval of the Project should be upheld because the Project serves to build high quality Company housing meeting the high standards adopted by the City of Yuma, the Project site is consistent with current zoning and the 2022 General Plan, the Project complies with Yuma City Codes, and the record does not support an argument that the Project will have impacts that have not been addressed.

Yours truly,

Wesley Van Camp,  
Vice President - Legal & General Counsel
